

Convivium

STORAGE UNITS

2014

Antonio Citterio

Description

The Convivium storage unit features the roto-translating door opening system. It takes the place of a large storage unit used in a dining room and is designed to store all of the tableware in a dedicated space. The Convivium storage unit features beautifully engineered mechanisms and luxurious leather lined drawers. It offers an impressive volume of storage, including a central drawer unit designed for table linen and cutlery storage. The beautiful aesthetic qualities of the Convivium storage collection invites it to be placed amidst important guests.

Technical information

Side, lid and base-frame

solid wood, veneered plywood panel with honeycomb-core and wood particles

Back panel

wood particles panel covered in leather melamine faced

Roto-translating door

veneered plywood panel with honeycomb-core and wood particles with veneered multi-layered frame
