Description

The theme of construction as a language lies at the centre of the project of the Abaco armchair. Architecture, compositional precision, and the relationship between materials define its identity. The result is an essential and calibrated presence, in which the design of the wooden legs and the continuity between the seat, backrest, and armrest, covered in thick leather, create a measured balance between comfort and rigor.

Technical information

Legs
solid wood
Seat
curved multi-layered wood, shaped polyurethane
Back
curved multi-layered wood
Armrest
metallic sheet
Ferrules and spacers
nylon
Cover
thick leather
