

Poul Poul LED
DAGMAR MOMBACH, INGO MAURER & TEAM 1998

Materials: Paper, metal, stainless steel, silicone. Poul Poul LED is part of the MaMo Nouchies collection, developed by Dagmar Mombach together with Ingo Maurer and his team. As with all MaMo Nouchies, the shade is made of Japanese paper. It is shaped in the Dagmar Mombach workshop through several elaborate steps. Equipped with a dimmable LED module specially developed by the Ingo Maurer team for the MaMo Nouchies. The light is warm and soft, closely resembling that of traditional incandescent bulbs.

Light source

LED 9 W, 970 lm, 2700 K, CRI >90, EEC F (A–G). Equipped with built-in LEDs. These cannot be replaced by the user, but by a qualified professional.

Technical data

For 100–240 volts. With plug-in power supply, continuously dimmable via dimmer switch in the cable.

More info

Not suited for rooms with high humidity.
