Untitled

ARMCHAIRS

2026

Vincent Van Duysen

Description

Untitled is a seating system born from a reflection on the relationship between structure and comfort. The range includes linear sofas, modular elements, and an armchair, all sharing a solid wood structure that defines their identity and reveals their architectural design. Intentionally left visible, it is not only a supporting element, but an integral part of the visual and tactile experience of the product. A subtle chamfer runs along its edges, allowing light to gently trace the structure and reveal the precision of its lines. In contrast to this clear and essential framework, the cushions introduce softness and ease. They naturally embrace the structure, completing it rather than concealing it, in a measured balance between formal rigor and comfort. The armchair stands out for its large and particularly welcoming proportions, a clear invitation to relax.

Technical information

Frame
solid wood
Upholstery
shaped polyurethane of different density, polyester fibre, polyester fibre cover
Seat slats
multi-layered wood
Hardware
steel
Ferrules
thermoplastic material
Cover
fabric or leather
